

# GLOBAL

## The world's local mobile phone

### Quick Start Guide

## **SAR**

This mobile phone meets applicable national SAR limits of 2.0 W/Kg. The specific maximum SAR values can be found in the SAR information section of this guide.

When carrying the product or using it, maintain a distance of 1.5 cm from the body to ensure compliance with RF exposure requirements.

Power management

Restore to Factory setting (the default Password is **1234**)

Language settings: Select the Display and Writing language

Auto power on/off: Set the daily time for Power on and off.

Power management: Check the battery charge status

**Restore factory settings:** Warning - This will erase all user data. The password is: 1234.

**Keypad backlight time:** Set the backlight time key

**Auto keypad lock:** Set the timer for automatic keypad lock

## **Security**

**PIN:** Select open or modify the SIM PIN 1 code

**Modify PIN2:** Select to modify the PIN 2 code

**Phone locked:** Select a password to unlock the phone

**Modify the phone password:** Modify the phone unlock password

**Privacy:** Select a password to access specified functions such as access to call log, messages, camera and Contacts.

**Lock screen by end-key:** Select to activate End key for immediate screen locking.

**Blacklist:** Set the blacklist number/s that will be automatically rejected by the phone when calling or texting.

## **Call settings**

Enable Dual SIM or Single SIM to be connected after Power On.

Select to activate the following Call functions: Call diverts, Call waiting, Call barring

### **In Others, select**

Call timer reminder, Vibrate when call is connected, Auto redial, Auto reply by

SMS after rejecting a call and Auto record voice call

## **Connections**

Network Selection: If required while in Roaming, select a Network manually

## **Profiles**

Customize the phone Notifications in 5 different Profiles: Normal, Silent, Meeting, Indoor, and Outdoor.

Customization of notifications is including: Ring setting, Volume, Ring type and Other Alert Rings.

## **My files**

My files function is activated only with SD Card mounted in the phone; insert the SD Card into its slot under the SIM 1 slot.

## **Specific Absorption Rate (SAR) information.**

Your phone complies with applicable safety requirements for exposure to radio waves. These requirements are based on scientific organizations through periodic and thorough evaluation of scientific studies. These guidelines include safety margins designed to assure the safety of all persons, regardless of age and health.

The radio wave exposure guidelines employ a unit of measurement known as the Specific Absorption Rate, or SAR. Tests for SAR are conducted by using standardized method with the phone transmitting at its highest certified power level in all used frequency bands.

While there may be differences between the SAR levels of various phone models, they are all designed to meet the relevant guidelines for exposure to radio waves.

The SAR limit recommended by the international Commission on Non-Ionizing Radiation

## Protection

(ICNIRP), which is 2.0 W/kg averaged over ten (10) grams of tissue.

The highest SAR value for this mobile device which were recorded:

<b>Band</b>	<b>Position</b>	<b>SAR 10g (W/kg)</b>
GSM 900	Head / Body worn	0.397 / 0.156
DCS 1800	Head / Body worn	0.275 / 0.120
GSM 850	Head / Body worn	0.366 / 0.714
PCS 1900	Head / Body worn	0.236 / 0.427

## **Electronic devices**

Most modern electronic equipment is shielded from RF energy. However, certain electronic equipment may not be shielded against the RF signals from your wireless phone, therefore: Do not use your mobile phone near medical equipment without requesting permission.

### **Pacemaker**

Mobile phones may affect the operation of some implanted cardiac pacemakers and other medically implanted equipments. Pacemaker manufacturers recommend that a minimum separation of 20 cm (6 inches) should be maintained between a hand-held wireless phone and a pacemaker to avoid potential interference with the pacemaker. These recommendations are consistent with independent research by the Wireless Technology Research Association.

## **People with pacemakers**

Should always keep the phone more than 20 cm (6 inches) from their pacemakers when the phone is switched on.

Should not carry the phone in a breast pocket.

Should use the ear opposite to the pacemaker to minimize the potential for interference.

If you have any reason to suspect that interference is taking place, switch off your phone immediately.

## **Hearing aids**

Some hearing aids might be disturbed by mobile phones. In the event of such disturbance, you may consult your Operator, or call the customer service line to discuss alternatives.

## **Aircraft**

Please comply with the Airline regulation. To prevent interference with the aircraft communication systems you must switch off your mobile phone while the plane is in the air.

## Safety Information

The mobile phone is made in exquisite process. Please be careful while using.

The suggestions below will help to extend the service life of the mobile phone.

Keep the mobile phone and all its parts and accessories away from children.

Keep the mobile phone dry.

Keep it away from the substances such as rain, moisture and liquids that may erode the circuits.

Do not use the mobile phone at places with too much dirt or put it at these places to avoid damaging the activate parts.

Do not put the mobile phone at the place with high temperature; otherwise, it will shorten life of the circuit, and damage the battery and plastic parts.

Do not put the mobile phone at cold place. When it becomes warm (normal temperature), moisture will generate in the mobile phone and damage the circuit board.

Do not wash the mobile phone with corrosive chemical agent, cleaner or strong

detergent. Dip soap water with soft cloth to wipe the mobile phone.

If the mobile phone or any accessory can't work normally, please send it to qualified service center.

Note: Please dispose the used products according to local regulations.

## **External Accessories**

**SD-Card:** The SD-Card slot is located under SIM 1.

**USB data cable:** In power off state, connect the mobile phone to PC with the USB data cable to access files and charge the battery. In power on state, connect the mobile phone to PC with the USB data cable to access the phone storage.

**Travel charger:** For Charging the phone battery from the Mains Power

**Note:** Please use original qualified accessories.

## **Safety Information**

Please read and follow these concise rules carefully to prevent danger or breaking laws.

### **Driving safety**

Do not use mobile phone when driving. Use the hands-free accessories if you have to use the phone. Put the mobile phone in the holder, instead of the passenger seat or any place that the phone may fall off.

### **Power off in aircraft**

The interference of mobile phone will affect the flight safety and it is illegal to use mobile phone in aircraft. Please switch off you mobile phone before boarding.

### **Power off in the operation area of explosion**

Please follow the regulations or rules and switch off your mobile phone in or near operation area of explosion.

### **Power off near dangerous articles**

Please turn off your mobile phone at gas station or places near fuels and chemicals.

### **In hospitals**

Please follow the regulations or rules of hospitals when you use mobile phone there.

Switch the device off near medical equipment. Any wireless device, including mobile phone, will interfere with the medical devices which are not fully protected. Other electronic devices also may be affected. If you have any question, please consult your doctor or the manufacturer.

### **Interference**

Any mobile phone might be interfered with and its performance will be affected thereby.

### **Professional service**

Only qualified maintenance personnel can install or maintain this mobile phone.

It may cause serious danger and also violates warranty clauses if you install or maintain the mobile phone by yourself.

## **Accessories and battery**

Use manufacturer approved accessories and batteries only.

## **Regional application**

Use the mobile phone in normal way. Do not put your mobile phone in the environment with too high temperature, higher than 60°C, for example, put it under the window which is radiated by direct sunshine. It is recommend using your phone at temperatures from 5°C to 35°C.

Please use wet or antistatic cloth to clean your phone.

Do not use the cloth with static to wipe the phone.

## Emergency call

Make sure that the mobile phone is switched on and in service area, enter the emergency number (for example 999) and press the Call key to call the number. Report your position and explain your condition briefly.

Do not end the call without permission.

**Note:** Like other mobile phones, the characteristics of this phone may be not supported because of the network coverage or wireless signals transmission. Certain networks even don't support emergency call. Therefore, do not depend on mobile phone only for very important communication (e.g. medical emergency). Please consult your local network operator.

## **Declaration of Conformity**

Product: GSM / BT mobile phone

Model: DMW7
